

FCC Amateur Radio General Class Question Pool Study Aid

The W5JCK Guide to the Mathematic Equations Required for the Amateur Extra Class Exam

This document contains every question from the Extra Class (Element 4) Question Pool* that requires one or more mathematical formulas to answer. Each question illustrates every formula necessary to answer the question in an easy to understand, step-by-step process.

*Question Pool Element 4 - Extra Class, as released by the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators November 30, 2001. Question Pool Element 4 was updated effective December 15, 2006 to reflect the FCC Report and Order (R&O) on docket 04-140. The current question pool is valid until June 30, 2008.

I designed this document as an aid for reviewing the mathematics necessary to solve the exam questions. It does not cover the mathematical or electrical theories behind the equations. To study the theory, I highly recommend The ARRL Extra Class License Manual and Gordon West's Extra Class FCC License Preparation for Element 4. Both of these publications were of great help to me in preparing for my Amateur Extra Class exam.

This document is copyright © 2007 by Ceburn Jack Swinden, W5JCK, and may be freely distributed. Good luck on your Amateur Extra exam.
